PROFILE

Software developer in training (Level 6 Diploma, Techtorium NZIIT; Level 5 Diploma in Web Development & Design, A+) who doesn't fit neatly in one box: former professional snowboarder, car tinkerer, seven years in customer-facing roles, and now someone who builds things that feel good to use, from responsive web apps to smooth Unity gameplay systems and clean MAUI interfaces. I like taking something rough, breaking it down and rebuilding it into something simple and useful, then explaining it to people who just want it to work. I use Claude and Microsoft Copilot most days, have set up a local AI environment with Ollama, and I'm keen to move from using AI to building agents and automations for real businesses. Looking for full-time work, Auckland-based. Full driver's licence; available to start after a two-week notice period with my current employer.

THINGS I'VE BUILT

Team Leader — *GarageLog — Capstone Project (Django)* **October 2026 – Present**

- Leading a three-person team through an eight-week Agile build of a vehicle service and maintenance reminder platform for independent New Zealand workshops, with customer, mechanic and admin roles.
- Own the architecture, database design, authentication and role-based access, vehicles, dashboards and analytics, plus code review, Git workflow and sprint planning.
- Building booking with double-booking prevention, a job-card workflow, parts inventory and WOF and registration expiry email reminders, with pytest, GitHub Actions CI and free-tier hosting.

Complete 2D Game — *Asteroid Blast (Unity)* **2026**

- Built a complete 2D space game covering design, animation, sound/visual effects and scripting, with multiple levels, main/pause/win menus and a scoring system.
- Ship flies on physics-based thrusters and rotation rather than simple sprite movement; asteroids spawn at random points, with a chasing variant that behaves differently.
- Added pickups, health and respawn, and a time-freeze power-up, all connected through a central event system so gameplay, UI and audio stay independent of each other.

Team Leader — *CampusPulse — Campus Community App (.NET MAUI)* **2026**

- Led a three-person team over two Agile sprints building an app with role-based accounts, a feed, events with registration limits, and reporting/moderation tools.
- Kept a written security risk register (SQL injection, access control, token storage) and worked through the mitigations as a team.
- Handled a mid-project change request from our trainer by logging it, assessing its impact on the existing system, and delivering it without breaking what was already there.

More Projects — *During diploma studies* **2025 – 2026**

- VehicleManager: ASP.NET Core and Razor Pages web app with Entity Framework Core and SQL Server for managing vehicles and weight categories, built as a technical assignment.
- Quick Queue: group café-ordering app in .NET MAUI; group coding lead in a four-person Agile team using Git and Azure Boards.
- BookShelf: full MAUI app with navigation, SQLite storage and a scrolling collection view with observable state.
- Tech store website: a Django web application with a database backend.
- Local AI environment: configured and tested Ollama, running smaller models within my hardware's limits.

EXPERIENCE

Operations Team Member — *Bunnings, Silverdale* **July 2025 – Present**

- Supporting daily store operations including inventory handling, stock replenishment, and maintaining organised product displays.
- Working out what customers actually need and explaining practical DIY solutions in plain language.

- Ensuring a safe and efficient work environment through adherence to operational procedures and effective team communication.

Customer Service Representative — *BP Service Station, Millwater* **July 2024 – July 2025**

- Served customers and performed checkout duties in a fast-paced environment.
- Prepared food, completed temperature checks, and followed all health and safety procedures.
- Handled hazardous substances safely and ensured correct PPE usage.

Warehouse Picker/Packer — *Mighty Ape, Silverdale* **October 2023 – December 2023**

- Picked online customer orders accurately within set timeframes.
- Packed and prepared orders for shipment.

Deli Assistant — *New World, Whangaparāoa* **December 2022 – May 2023**

- Followed strict food safety standards to ensure all food produced was safe to eat.
- Served customers in a friendly and timely manner.
- Maintained cleanliness and organisation of the deli area.

Snowboard Instructor / Customer Service — *Snowplanet, Silverdale* **November 2019 – June 2022**

- Delivered group and individual lessons as a qualified Level 1 Snowboard Instructor, adapting to each customer's confidence and ability.
- Operated lifts safely and efficiently while ensuring customer safety and smooth flow.

EDUCATION

Techtorium NZIIT **2025 – 2026**

- Level 5 Diploma in Web Development & Design — A+
- Level 6 Diploma in Software Development (Currently Studying)

TECHNICAL SKILLS

AI	Daily use of Claude and Microsoft Copilot; local models via Ollama. Next: agents, MCP, automation platforms
Languages	C#, Python, JavaScript, HTML, CSS, XAML
Web, Apps & Data	Django, ASP.NET, React, .NET MAUI, Unity, SQLite, SQL Server, Entity Framework Core
Tools & Cloud	Git, GitHub, Azure DevOps, Azure Boards, Visual Studio, VS Code, Figma

SOFT SKILLS

People	Explains technical things plainly, patient, comfortable talking to anyone
Self-Starter	Would rather figure it out than wait to be told; picks up new tools quickly
Systems Thinking	Cares how things connect, talk and flow, not just the code
Troubleshooting & Discipline	Calm, methodical troubleshooter (cars and code); discipline and flow from years of snowboarding

ACTIVITIES & INTERESTS

Former professional snowboarder, working on and tuning cars, gaming, cooking, gardening, plants, biology.
